LOGO

Primary wordmark

Coforge's evolved logo takes a cue from the concept of 'the whole is greater than the sum of its parts'.

In the primary wordmark, two halves become transformed to a whole representing forged partnerships and transformation at the intersect.

This logo stands for Coforge's current values and goals and is future-ready for the company's long term vision.

The logo features the word "Coforge" in a bold, sans-serif typeface. The letter "C" is a solid orange-red color. The letter "o" is split vertically down the middle; the left half is orange-red and the right half is a dark navy blue. The remaining letters "f", "o", "r", "g", and "e" are all in the dark navy blue color.

Secondary wordmark

When the primary wordmark for Coforge cannot be used in its original two-color format, the secondary wordmark should be used. Some scenarios where the secondary wordmark can be used are

1. Single color printing requirement
2. Black & white printing requirement
3. Stamps and seals
4. Foil-pressed logo requirement
5. Blind embossing logo requirement
6. Logo Cutout requirement
7. Etching or burning on wood, glass, etc.
8. Single color or metallic 3D signage

The wordmark 'Coforge' is displayed in a bold, sans-serif font. The letter 'C' is a vibrant orange, while the remaining letters 'oforge' are a dark navy blue. The 'C' has a small gap in its top-right curve.The wordmark 'Coforge' is displayed in a bold, sans-serif font, entirely in a dark navy blue color. The 'C' has a small gap in its top-right curve.

Primary wordmark variations

The primary wordmark has three usable color variations

1. coral+blue
2. white+blue
3. coral+white

Coforge

Coforge

The secondary wordmark has three usable color variations

1. white
2. coral
3. blue

Coforge

Coforge

Coforge

Coforge

Minimum clearspace

No content, partner logo or image should be placed inside this area.

This minimum clearspace guideline is applicable to both primary and secondary wordmarks.

Minimum sizes

For optimum legibility, these minimum size guidelines should always be followed when using Coforge logo.

In no case should the size of the logo be reduced further than specified on this page.

Print

Coforge

Coforge

Secondary wordmark

Icon

Logo in alternate orientation

In special cases where branding is required on extreme vertical dimensions like vertical slide shows, stage wings, roll ups, etc., the primary and secondary wordmark can be rotated by 90 degrees counter-clockwise to get a usable alternate orientation.

All the rules of logo use apply to the alternate orientation.

When the message is placed in vertical orientation, it should also be rotated counter-clockwise.

counter-clockwise rotated logo
counter-clockwise rotated text

counter-clockwise rotated logo
counter-clockwise rotated text

clockwise rotated logo

clockwise rotated text

Incorrect logo use

Coforge logo should only be used in one of the permissible variations. Any deviation from the defined logo use should be strictly avoided.

Some examples of incorrect use of the logo are shown here.

In the primary wordmark, C+half o will never be in navy blue and half o+forge will never be in coral

Do not use the primary wordmark in a single color

Do not use the logo in colors other than the specified brand colors

Do not use the secondary wordmark in two colors

Do not distort the logo proportions

Do not add special effects to the logo

Do not rotate the logo by random degrees. An alternate logo orientation is defined on page xx.

Do not apply drop shadow to the logo

Incorrect logo use

Coforge logo should only be used in one of the permissible variations. Any deviation from the defined logo use should be strictly avoided.

Some examples of incorrect use of the logo are shown here.

Do not change the font in the wordmark

Do not hyphenate or split the logo in any way

Do not rearrange the logo

Do not ignore the clearspace guidelines for the logo

Do not use the logo on backgrounds with inadequate contrast

Do not use the logo on backgrounds with inadequate contrast

Do not use the primary wordmark on black background

Do not use the secondary wordmark on black background

COLOR

Primary colors

Use Neutral gray as the default color for body copy. Pantone codes should only be followed in special cases where physical matching of the approved samples is impossible.

Coral

Color proportion

Refer to these color scales for a visual judgement on color proportions in a design.

Color scale A

When using one primary color as a background color or a key color, the other primary color and secondary colors should be used in limited amounts or as accents.

Color scale B

When using a secondary color as a background color or a key color, the primary colors should be used in limited amounts or as accents.

color scale A

color scale B

Color proportion in use

color scale A in use
white in background to balance image, coral as key color, secondary colors have a limited use

color scale A in use with a photograph
coral in background with white text and navy blue accents

color scale A in use
navy blue in background with limited use of coral and secondary color accents

color scale B in use
secondary green in background with white headline and navy blue accents

Color use in background

A single or both primary colors can be used together in a background, keeping with the defined color proportions.

A secondary color can be combined with either one of its tints or a primary color for backgrounds.

Do not use two secondary colors together for a background.

primary color in the background

two primary colors in the background

secondary color with its tint in the background

two secondary colors in the background

secondary color with primary color in the background

two secondary colors in the background

white in the background

black in the background

Color use in foreground

Foreground Graphics

For foreground graphics like CTA boxes, design assets, buttons, etc. primary or secondary colors can be used but using primary and secondary colors together should be avoided.

Infographics

Infographics in designs and presentations should use the medium and light-medium secondary colors. Use of dark or light secondary colors and primary colors should be avoided.

Illustrations

The brand color palette should be used for rendering illustrations, non-brand colors should be avoided.

foreground graphics in secondary colors

too much use of a single color creates overwhelming visuals

— LOGO APPLICATION

Logo on secondary colors

Dark colors
The white-navy blue primary wordmark or the white secondary wordmark should be used on dark secondary colors.

Medium & light-medium colors
None of the Coforge logo variations should be used on medium or light-medium secondary colors.

Light colors
The coral-navy blue primary wordmark or the navy blue secondary wordmark should be used on light secondary colors.

Black
Only the white secondary wordmark should be used on black background.

	primary wordmark	secondary wordmark
dark colors		
medium colors		
light-medium colors		
light colors		
black		

Logo on non-brand colors

Always use the full-color primary logo in a white patch on non-brand colors.

The size of the white patch can be determined based on the minimum clearspace guideline.

Logo on textures

When using the logo against textures, e.g., as signages on walls or building facades, both the colours of the logo should stand out distinctly against the background.

On materials like wood, stone or metal where navy blue background cannot be achieved

1. Use primary wordmark with appropriate contrast
2. Use secondary wordmark in single color if both the colors of primary wordmark fail to stand out
3. When a background doesn't provide adequate contrast, place the logo on a white patch or material

textured backdrops with acceptable contrast

textured backdrops with inadequate contrast

Logo on textures

On leather and synthetic materials that can have custom colors

1. Use primary wordmark on white or navy blue surface
2. Use secondary wordmark on surface of any other color
3. Use secondary wordmark to blind emboss logo on any surface

Other materials and techniques

1. Use secondary wordmark for etching, cutting or foil pressing on acrylic, glass, wood and derived materials like mdf, cork, etc or any other material
2. Use secondary wordmark to construct 3D signages in materials where blue and orange color cannot be achieved e.g., steel

print primary wordmark on navy blue leather

print or blind emboss secondary wordmark on leather in other colors

Use secondary wordmark in white or silver instead of gold or yellow metal for signages

Use secondary wordmark for etching on wood and glass

Logo on textures

For fabric, follow the same rules of logo application as on paper or digital design

1. Use primary wordmark on white, navy blue or coral fabric
2. Use secondary wordmark with appropriate contrast on fabric of secondary brand colors
3. Use secondary wordmark to print or embroider on fabric where two color primary wordmark cannot be used

print/ embroider
primary wordmark
on navy blue, coral
or white fabric

print/ embroider
secondary wordmark
on navy blue, coral
or white fabric

Partner logo interaction

Partner logo should ideally be placed centrally aligned and placed after or below Coforge logo.

Space between logos $\geq 2 \times o$

Coforge

Stacked arrangement

Linear arrangement

Partner logo interaction

To achieve visual balance between logos, use either of the following parameters depending on the dimensions of the partner logo

Length of partner logo \leq length of Coforge logo

OR

Height of partner logo \leq height of Coforge logo

partner logo height = coforge logo height
partner logo looks too small

partner logo length = coforge logo length
both logos look balanced

partner logo length = coforge logo length
partner logo looks too big

partner logo length < coforge logo length
both logos look balanced

partner logo height = coforge logo height
partner logo looks too big

partner logo height < coforge logo height
both logos look balanced

Partner logo interaction

When there are multiple versions available for the partner logo, **choose a linear arrangement over a stacked arrangement** to use with the Coforge logo, for better visual balance.

Avoid using stacked logos with the Coforge logo

Linear logo arrangement for partner logo

Avoid using stacked logos with the Coforge logo

Linear logo arrangement for partner logo

Partner logo incorrect use

Partner logos should be visually and functionally balanced with Coforge logo. Avoid certain scenarios of partner logo use as demonstrated here.

Do not ignore clearspace guidelines
Note: Clearspace for partner logos is different than minimum logo clearspace

Do not use partner logos in imbalanced proportions

Do not place partner logos above or before Coforge logo

Do not align logos on one side

Partner logo in presentation

Title Slides

Placement: Top right corner inside the margin

Size: Should fit inside a space of 300 x 120 px

Content Slides

Placement: Next to Coforge logo in footer at a distance of 2 x 'o'

Size: Should fit inside a space of 120 x 40 px

Don't

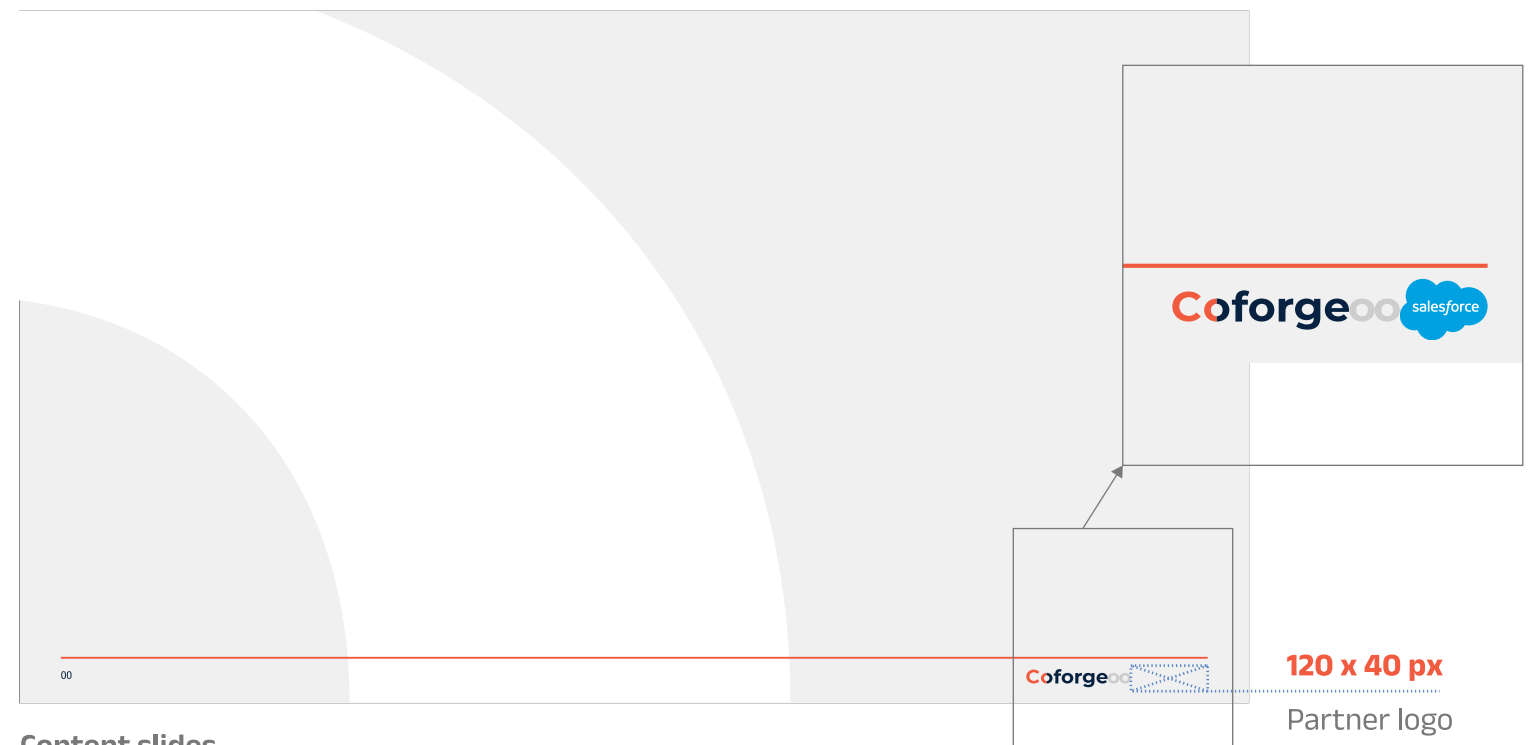

Ignore Coforge logo clearspace when using partner logos

Exceed the specified maximum partner logo size

Place partner logos in a colored/outlined box unless it is unavoidable

Title slides

Content slides

— SUB-BRAND LOGOS

Services - logo features

Defining fetures for Services Sub-brand logos for both stacked and linear arrangements

1. Separator line between Coforge logo and service name
2. Service name in montserrat semi-bold in 65% gray
3. 'Services' in montserrat light in 65% gray
4. Service name can be in one or two lines followed by 'Services' in the next line
5. Leading = point size

linear arrangement

Products - logo features

The colors and various weights have been defined to maintain visual balance among short and long product names.

In case of abbreviations:

Symbol: in 65% gray with coral accents
Name of the initiative/product:
montserrat extra bold in 65% gray
Full form/description:
montserrat regular in 65% gray

In case of product name plus descriptor line:

Symbol: in 65% gray with coral accents
Name of the initiative/product:
montserrat bold in 65% gray
Description: montserrat regular in 65% gray

In case of long product names:

Symbol: in 65% gray with coral accents
Keywords of initiative/product: montserrat
semi bold in 65% gray
Following words of initiative/ product:
montserrat semi bold in 65% gray

In case of two-part product names:

Symbol: in 65% gray with coral accents
First part of the initiative/product:
montserrat semi bold in 65% gray
Second part of the initiative/ product:
montserrat semi bold in 85% gray

Products - logo construction

Product sub-brand logos only have stacked arrangement.

TYPOGRAPHY

Primary Typeface

Anek is the primary typeface for Coforge and should be used for all communication design.

A modern sans serif font with a personality, Anek is a vast multilingual font family that enables having visual consistency across regions and languages. Some of the key features that make Anek a suitable typeface for Coforge are

- Winner of D&AD 2022
- Designed and conceptualised in India
- Variable font feature supports a full range of weights and widths
- Open source typeface prevents licensing issues
- Available on google fonts, supported across platforms
- Available in 10 scripts
- Unique styling along with clean legibility of a text type

Basics of Typography

Headlines & titles

- should use light, bold or a combination of light & bold weights
- should have largest font size in a design
- can use title case, sentence case or upper case but never all lower case
- leading should be equal to text point size

Body Copy

- should use regular weight with semibold weight for highlighting text
- should use sentence case
- default leading should be used
- should be in 80% gray (neutral gray)

Subheads & other text

- sub-headlines, subject lines, key lines, page numbers, etc
- should use light or combination of light & bold weights
- can use any case as long as consistency is maintained within a design
- default leading should be used

subject line
upper case
light & bold weights

CASE STUDY 01

Excepteur sint occaecat cupidatat non proident, sunt in culpa qui officia deserunt mollit anim id est laborum.

14 pt body copy with
default leading
regular weight
sentence case

High Contrast in Typography

Text in all communication, print and web, should use high contrast in size, weight and colour. This helps Coforge use text as an opportunity to create impactful visuals.

Size

Size variation among text blocks should always be high. E.g., a headline can be at 72 pt while the body copy can be at 14 pt.

Weight

Weight variation within a text block and among different text blocks should be high. E.g., A headline can be split into light and bold weights, or a headline in all bold weight can be followed by body copy in regular weight.

Color

Color use should also follow high contrast in typography. Whether using the primary or the secondary color palette, color contrast between text blocks and text & background should always be high.

example of high contrast in weight & size between headline and body copy

Engage with the Emerging

Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua. Ut enim ad minim veniam, quis nostrud exercitation ullamco laboris nisi ut aliquip ex ea commodo consequat.

example of high contrast in weight within a subject line

CASE STUDY 01

Simplifying .NET Migration

example of high contrast in size and color between a subject line and headline

example of high contrast in weight and color within a headline

Headline styling

Here are a few examples of type treatments that work for headlines

1. Anek bold in Title case
2. Anek bold in title case, two color
3. Anek light + Anek bold in title case
4. Anek light + Anek bold in upper case with size and color variation
5. Anek bold + Anek light in title case
6. Anek semi condensed light + Anek semi condensed bold in upper case
7. Anek condensed light + Anek condensed bold in upper case with size variation
8. Anek expanded bold + Anek bold with color and size variation

Maintain consistency of styling within a document or design. E.g., in a presentation, write headlines in the same style on every page.

Font pairing

Pair font weights and size in high contrast. Pair widths that are not too different from each other. Keep in mind the hierarchy of content and use case when choosing font pairing.

Here are a few examples to illustrate the font pairings that work and those that don't.

✓ **Engage with the Emerging**
Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua.

Bold, bigger headline, smaller regular body copy

✓ WHITE PAPER 01
New Era in P&C Insurance
Cloud Computing

Small but distinct subject line, bigger headline

✓ **CLOUD LOG ANALYSER FOR APPIAN**
Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua.

Condensed headline with smaller condensed body copy

✓ **Gamificaton:**
Fueling sustainable growth
in the Insurance industry
Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua.

Expanded headline with bold subheadline and condensed body copy

✗ **Engage with the Emerging**
Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore.

Smaller but bold body copy competes with the bold headline

✗ WHITE PAPER 01
New Era in P&C Insurance
Cloud Computing

Large subject line competes with large headline

✗ **CLOUD LOG ANALYSER FOR APPIAN**
Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua.

Condensed headline with expanded body copy creates imbalance

✗ **Gamificaton:**
Fueling sustainable growth
in the Insurance industry
Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor.

Condensed light-bold-expanded pairing creates visual chaos

Basic Punctuation

1. Keep use of commas, periods and other punctuation marks to a minimum. Compose short and clear sentences to avoid over-punctuation.
2. Use only left aligned text, avoid right aligned or center aligned text
3. Never use justified text
4. Avoid using hyphenation to break long words
5. Avoid the use of period after bullet points unless a bullet point has more than one sentence
6. Do not use commas or semicolons in a bulleted list

✓ **Becoming Future Ready**

headline without period

✓ Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua.

left aligned text

✓ **Meeting at 8 am**

no dots in am

✓ **Engagement Activities**
Art & craft related skill development
Construction of retail outlets. These outlets are for publishing, distribution & sale of products.

full stop used only in multi-sentence bullet point

✗ **Becoming Future Ready.**

unnecessary period

✗ Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua.

justified text

✗ **Meeting at 8 a. m.**

dots after am

✗ **Engagement Activities**

— VISUAL ELEMENTS

Visual imagery

Visual imagery for Coforge should pass through the following filters.

Engaged & Engaging

Images that show people engaged with each other or in a relevant activity that draw the viewer in, engaging the viewer

Slice of Life

Images that depict real life and relatable situations

Pleasant & Positive

Images that show happy faces, people with pleasant expressions and have a positive impression

Brand Extension

Images that incorporate brand colors or tones close to the brand colors that can provide a visual connect to the brand identity

Choosing right photographs

Choose the right photographs for Coforge communication based on the visual imagery filters.

engaging action

slice of life, relatable

happy expression and positive action

presence of brand colors

disengaged, distant

superficial and unrelatable

unhappy expression, negative impression

lack of brand colors

Choosing right illustrations

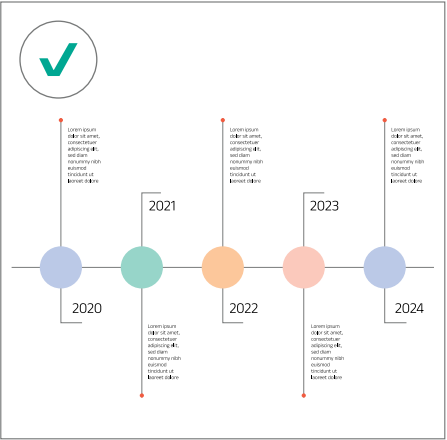

Choose the right illustrations for Coforge communication based on the visual imagery filters.

engaging, happy expression

within brand color palette

neat and professional

relatable

not engaging, unhappy expression

outside brand color palette

cluttered and confusing

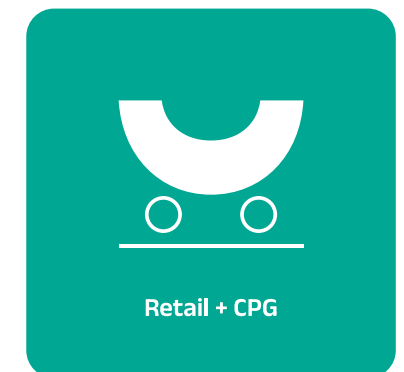

abstract, unrelatable

Iconography set 1

Industry icons

The first set of icons is a custom designed set to represent the industries Coforge works in. These icons have a clean bold look and are unique to Coforge.

Iconography set 2

Service icons

The second set of icons is used to represent the services Coforge provides

Features of icons set 2

- line drawings in a 1:1 space
- round edged strokes
- rendered in coral on white
- encased in round edged outlined rectangles double the size of the icons

Design assets

Coforge has 2 design assets

1. The half O

The o from the logomark is split in the center vertically to derive the half o. Either half can be used as whole in the foreground or in part in the background.

2. The quarter O

The o from the logomark is split both horizontally and vertically to derive the quarter o. Either of the four quarters can be used as whole in the foreground or in part in the background.

design asset 1

the left half o asset

the right half o asset

design asset 2

the four
quarter o assets

Design assets & color

Coforge design assets can be used in all of the brand colours except for black.

All the tints of the secondary brand colours can also be used for the brand assets.

The half o and quarter o design assets can be used in solid color or in outlines.

design assets in background

Enlarge a design asset and mask it inside the design space to create a background.

1. Enlarge a design asset to cover approximately 30% to 80% of the design space
2. Move it freely, left & right and up & down, to get a good space division
3. Use the design asset as a solid colour or as outlines
4. When using as outlines, more than 1 design asset can be used as long as it is the same kind

half o design asset
is used in various sizes
to create three
different backgrounds

half o design asset
is enlarged and moved
freely to create a background
in solid color and another
with outlines

design assets in foreground

The half o or the quarter o can be used as a foreground graphic

1. For use in the foreground, the width of the half o or quarter o should be between $X/2$ and $X/12$, where X is the shortest side of a design space.
2. The design assets can only be used in solid color in the foreground, never in outlines.
3. A design asset can be used multiple times in one illustration

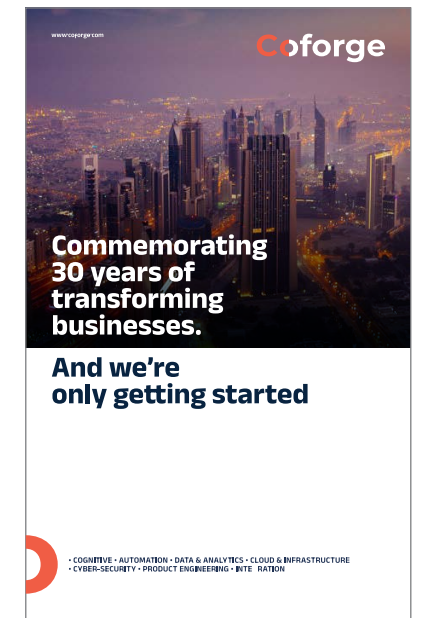

half o at $X/3$

quarter o at $X/2$

half o at $X/6$
use of lines to highlight information

half o at $X/12$

design assets in illustrations

The design assets can be used to create illustrations

1. Rotate the half o and quarter o assets by increments of 45 degrees (0°, 45°, 90°, 135° and so on) to use effectively in an illustration
2. Resize the design assets as required as long as they do not lose their character

half o asset used in illustration

quarter o asset used in illustration

Design assets incorrect use

Common scenarios of incorrect use of design assets are demonstrated here.

X

do not use special effects on design assets in background or foreground use

X

Do not add gradients to the design assets in background or foreground use

X

Do not fill a design asset with a pattern in background or foreground use

X

Do not use the half o and quarter o together in the foreground

X

Do not place the design assets floating, always place them against an edge unless in an illustration or icon

X

Do not use the design assets in outlines for foreground graphics, only for backgrounds

X

Do not use the design assets in non-brand colors in background or foreground use

LAYOUT

Design grid

To achieve a proportionate margin for any design space, divide the shortest side (X) by 30, irrespective of the measurement unit. This becomes the width of the margin on all four sides.

X = The shortest side of the design space

$$M1 = M2 = X/30$$

M1 - Images and backgrounds can bleed into this area. Page numbers, headers, footers, disclaimers, etc., can be placed inside M1 if necessary.

M2 - Safe area, no text should fall outside this area

X/30 is also the gutter space. The details of how to use the gutter to separate blocks of texts and visuals are provided on the following pages.

Grid & layout

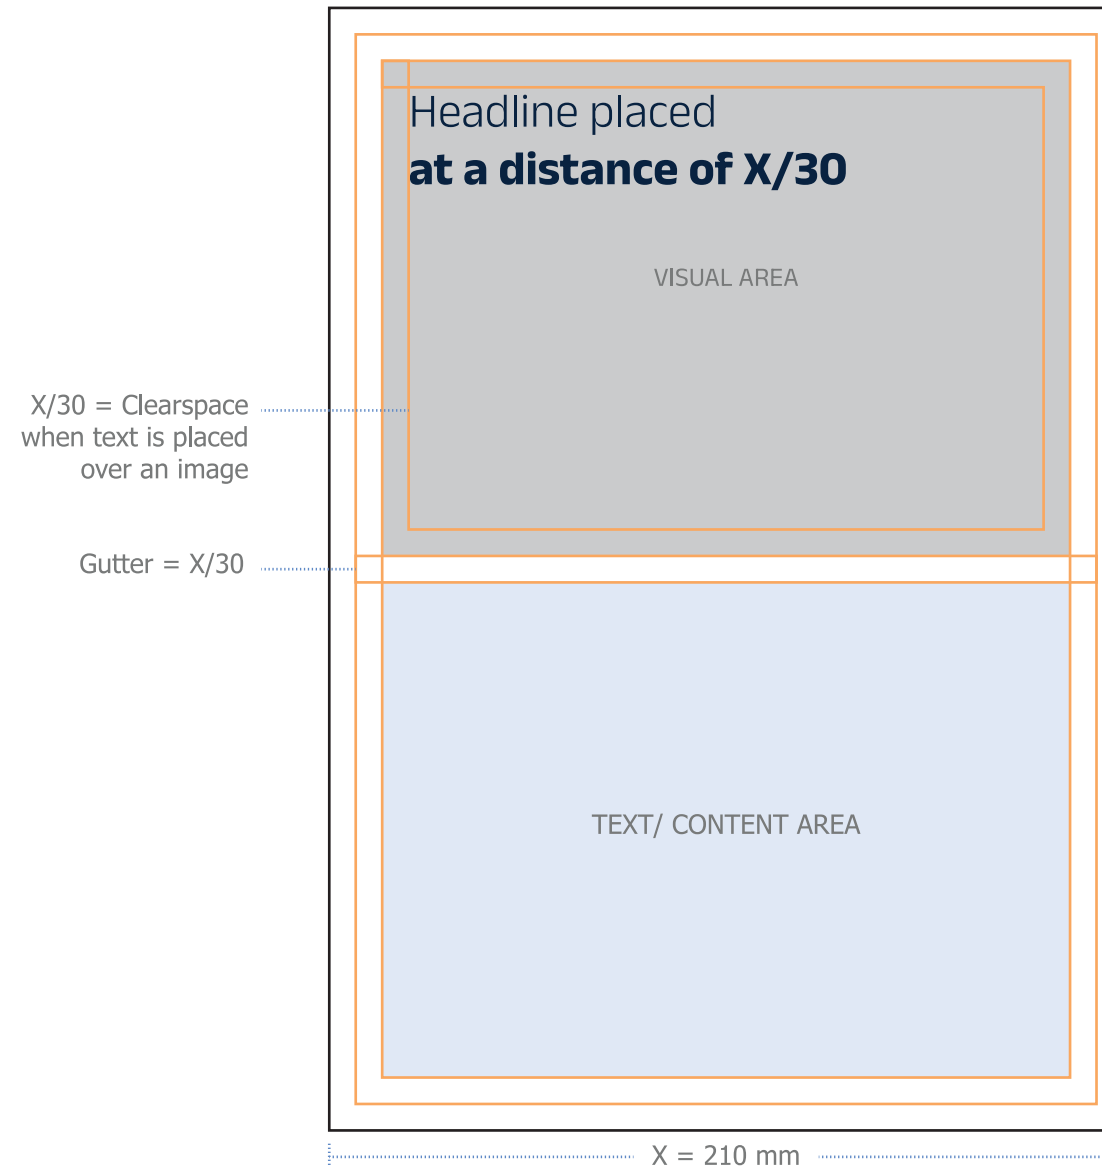

Gutter width = $X/30$

Use the gutter space to separate blocks of content or to separate columns and rows.

$X/30$ is also the minimum clearspace from the edge of an image on all sides when text has to be placed over an image.

A4 design space

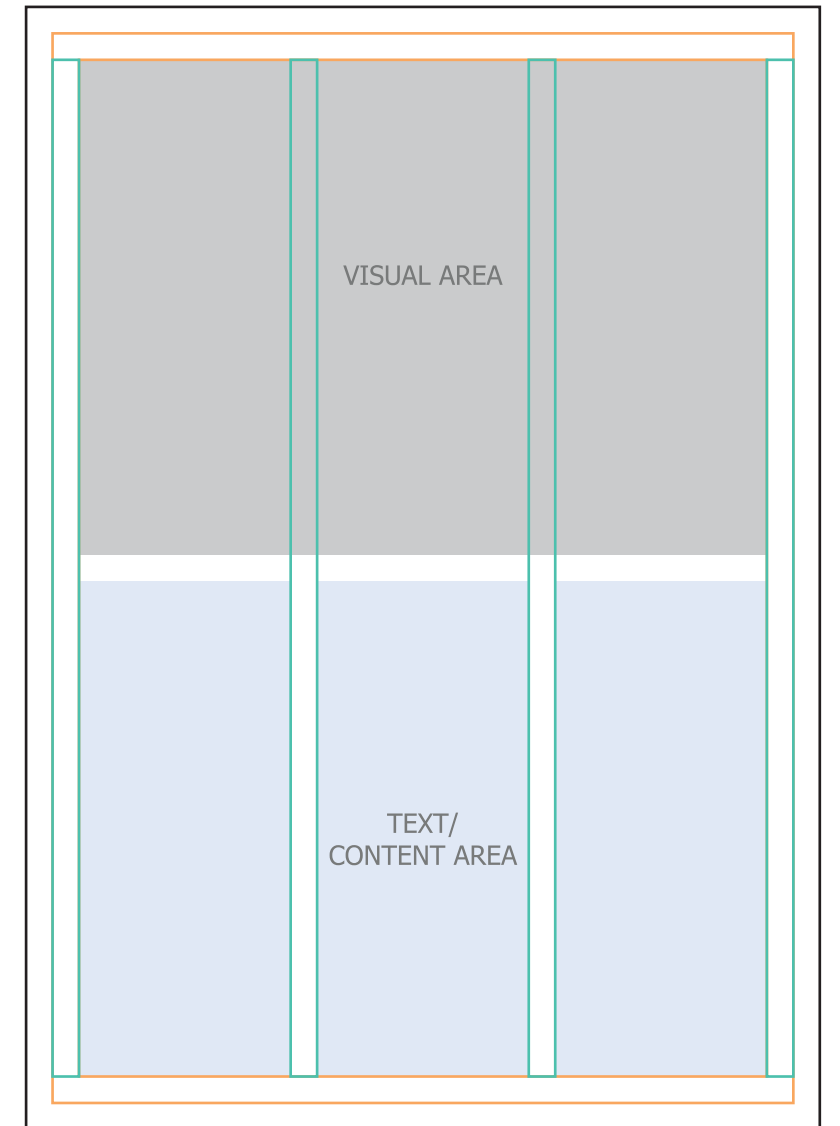

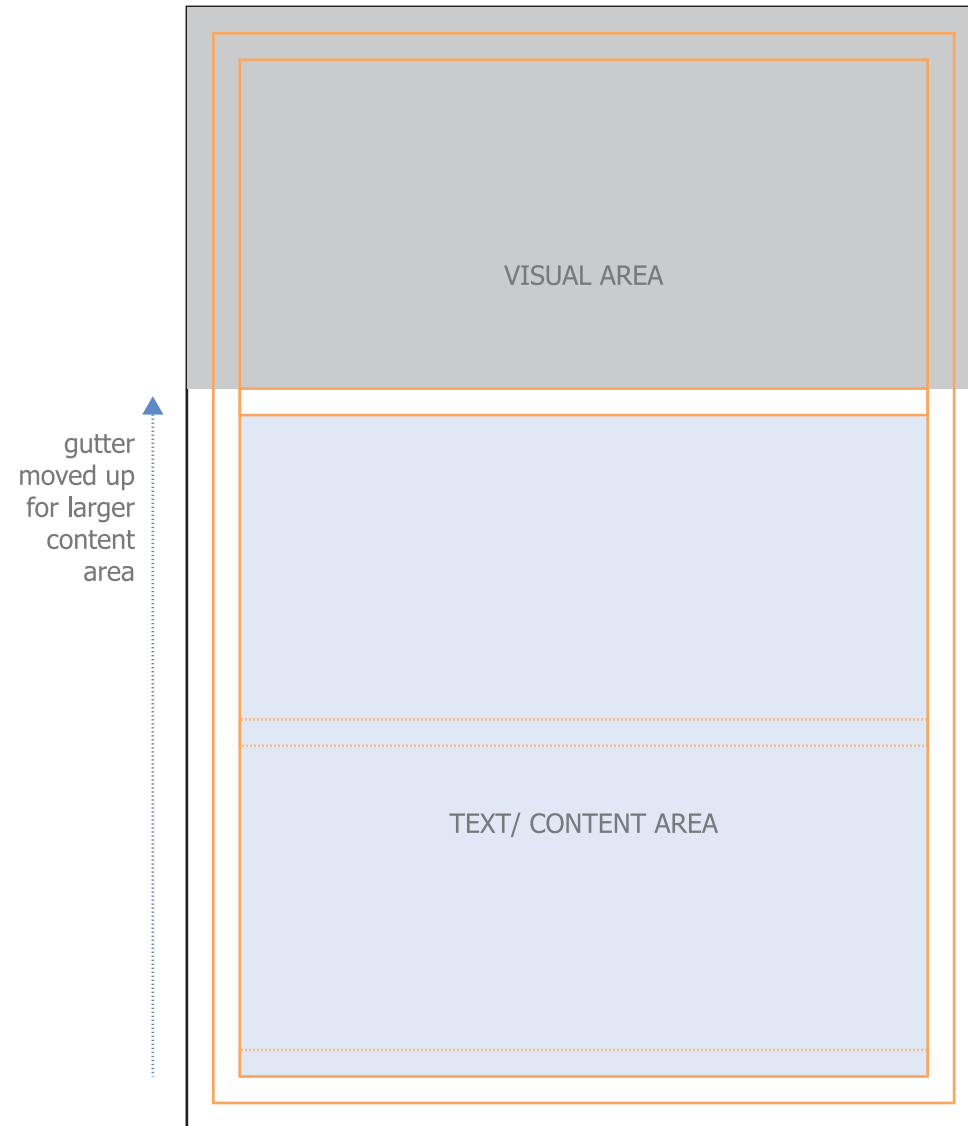

$X/30 = 210 \text{ mm}/30 = 7 \text{ mm}$

Grid & layout

There are two ways to use the gutter to divide a design space for an effective layout.

1. Move the gutter up and down or left and right in increments of the gutter width to define visual and content areas. The gutters can be moved the same way to make guidelines to place content in the content area.
2. Distribute one or more gutters at equal distance from M1 to get multi-column grids.

two gutters are placed equidistant from M1 to create a 3 column grid

Layouts based on grid

Examples of how to use the x/30 gutter for both horizontal and vertical space division..

The grey blocks indicate the main visual area, meant for photographs and illustrations.

The blue blocks indicate the area to compose text and supporting graphic content like tables, graphs, call to action units, etc.

For instances where text may need to overlap with an image, the guideline is provided on the previous page.

Clearspace in layouts

When placing the logo in a design space, the distance from the edges or margins should be at least equal to the defined minimum clearspace.

Even when stretching the logo for signages, etc. the minimum distance from an edge should be at least equal to the defined minimum clearspace.

There is no limitation on space exceeding the minimum clearspace around the logo.

Logo scale in layouts

Minimum logo width = $X/4.5$

X = shortest side of a design space

When stretching a logo across a design space, the minimum clearspace guidelines and margins should be kept in mind.

A4 design space

logo width = $X/3$

2' x 4' design space

stretched logo placed inside the margins and following minimum clearspace

Logo scale incorrect use

The width of the logo should never go below $X/4.5$, where X is the shortest side of a design space.

When stretching a logo across a design space, the minimum clearspace guidelines and margins should be kept in mind.

A4 design space

logo width $< X/4.5$

2' x 4' design space

stretched logo ignoring the margins and minimum clearspace

A4 layout example

A4 White Paper Cover

1. Full bleed background
2. Logo and typography follow guidelines

grid

layout based on grid

A4 layout example

A4 Brochure Cover

1. Image and background bleeding into M1
2. Logo and typography follow guidelines

grid

layout based on grid

A4 layout example

A4 Case Study

1. Two column, text heavy layout
2. Case Study number placed inside M1 while all other text content is placed inside M2
3. Use of gutter space for column division
4. Logo and typography follow guidelines

CASE STUDY 257

Cloud log analyzer for Applan

Business Problem Statement

- Continuous real time monitoring of Applan servers to flag major issues automatically
- Reduce the probability of server downtime by automatically alerting concerned teams about server issues that may lead to downtime
- Access Applan logs in a more structured form, thereby increasing readability of logs
- Build a scalable Applan server monitoring and log reader solutionvalue in an agile manner.

Solution Overview

The Cloud Log Analyzer solution for Applan delivers continuous real time monitoring of Applan servers, reduces the probability of server downtime by automatically alerting concerned teams about potential issues and facilitates better accessibility and readability of Applan logs.

Leveraging Cloud Log Analyzer, along with Coforge's Applan expertise and services, ensures you derive maximum value with minimum downtime.

Solution Benefits

- Enabled for High Availability Environment
- Read server logs automatically to determine key metrics that affect server performance
- Provide a monitoring dashboard to monitor various server metrics that helps in determining server health
- Send automatic notifications to concerned teams with potential server downtime warnings and area of issue in case server health is bad or critical
- Access and read various Applan logs with ease
- Provide service accessibility to anyone using Applan

Solution Features

within the organisation

- Compatible with both Applan cloud and on-premises solutions

Determine Key Metrics:

Cloud Log Analyzer automatically reads the various server logs to determine key metrics/ elements that have a major effect on server health

Monitoring Dashboard:

Cloud Log Analyzer provides a state-of-the-art monitoring dashboard to access and monitor all server health metrics to ensure Applan servers are running 24x7

Automatic Server Health Alerts:

Scheduled job sending email notifications to users with potential server downtime warnings and highlighting area of issues in case server health is bad or critical

Access and Read Server Logs:

Cloud Log Analyzer provides the user ability to easily access and read various Applan server logs with enhanced readability.

Admin Console:

Cloud Log Analyzer provides the ability to set up an Admin team who can configure

CASE STUDY 01 | Cloud log analyzer for Applan

Call out:

Cloud Log Analyzer automatically reads the various server logs to determine key metrics/ elements that have a major effect on server health. Eg: Errors / Warnings, Applan Disk Space, the details of various key logs and set thresholds for effective alert management for the environment.

Scalability:
Cloud Log Analyzer is a scalable service. It can be configured to provide accessibility to anyone using Applan

within the organisation and is also compatible with Applan cloud and On- premise solutions. This tool is easily deployable to any Applan cloud or on-premise environment running Applan version 211 and above MySQL Disk Usage, JVM Heap Memory Usage, JVM Average Load, JVM System Memory, Engine Average Load, Engine System Memory, Engine Swap Space, JVM Swap Space, CPU Idle Time PX001, CPU Idle Time PX011, CPU Idle Time PX021log reader solutionvalue in an agile manner.

VIDEOS

Logo animation

Here are some key frames in sequence showcasing Coforge logo animation. Logo reveal animation begins after the footage of the film fades into the blue background.

Videos - Logo placement

Coforge logo should be placed on top left in all videos. For thumbnails/ cover images, the logo should be placed on left bottom.

Default logo clearspace and margin rules should be followed.

Logo width = $X/4.5$

X = shortest side of a design space

Minimum Logo width = 42 px

logo width = $X/4.5$

16:9 aspect ratio

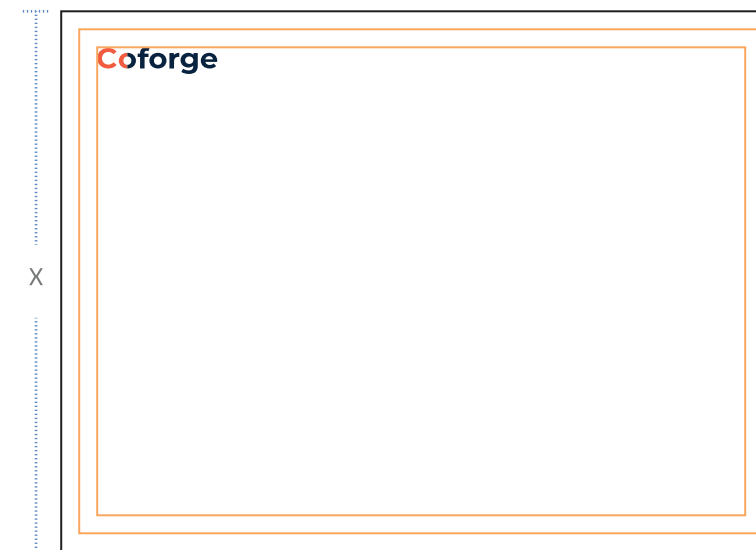

logo width = 42 px

video thumbnail

logo width = $X/4.5$

4:3 aspect ratio

logo width = $X/4.5$

1:1 aspect ratio

Video layout examples

Partner or supporting logos should be placed on bottom left, below Coforge logo.

If the Coforge logo cannot be placed on top left (e.g., a third party platform video has its own logo there) then it can be placed on top right.

Text in videos should follow all the standard typography guidelines.

Partner or supporting logo placement

Pre-existing third-party logo

alternate Coforge logo placement

Super styling option 1

- Using the half o design asset to mark the placement of text
- Using a solid color patch in a brand color for longer text content
- All text content follows standard typography rules set for Coforge
