

Is your business ready for a sustainable future?

The Urgent Path To Net Zero: Coforge ENZO For A Greener Planet

From Global Pact to Corporate Action: The Paris Agreement's Implications for Businesses

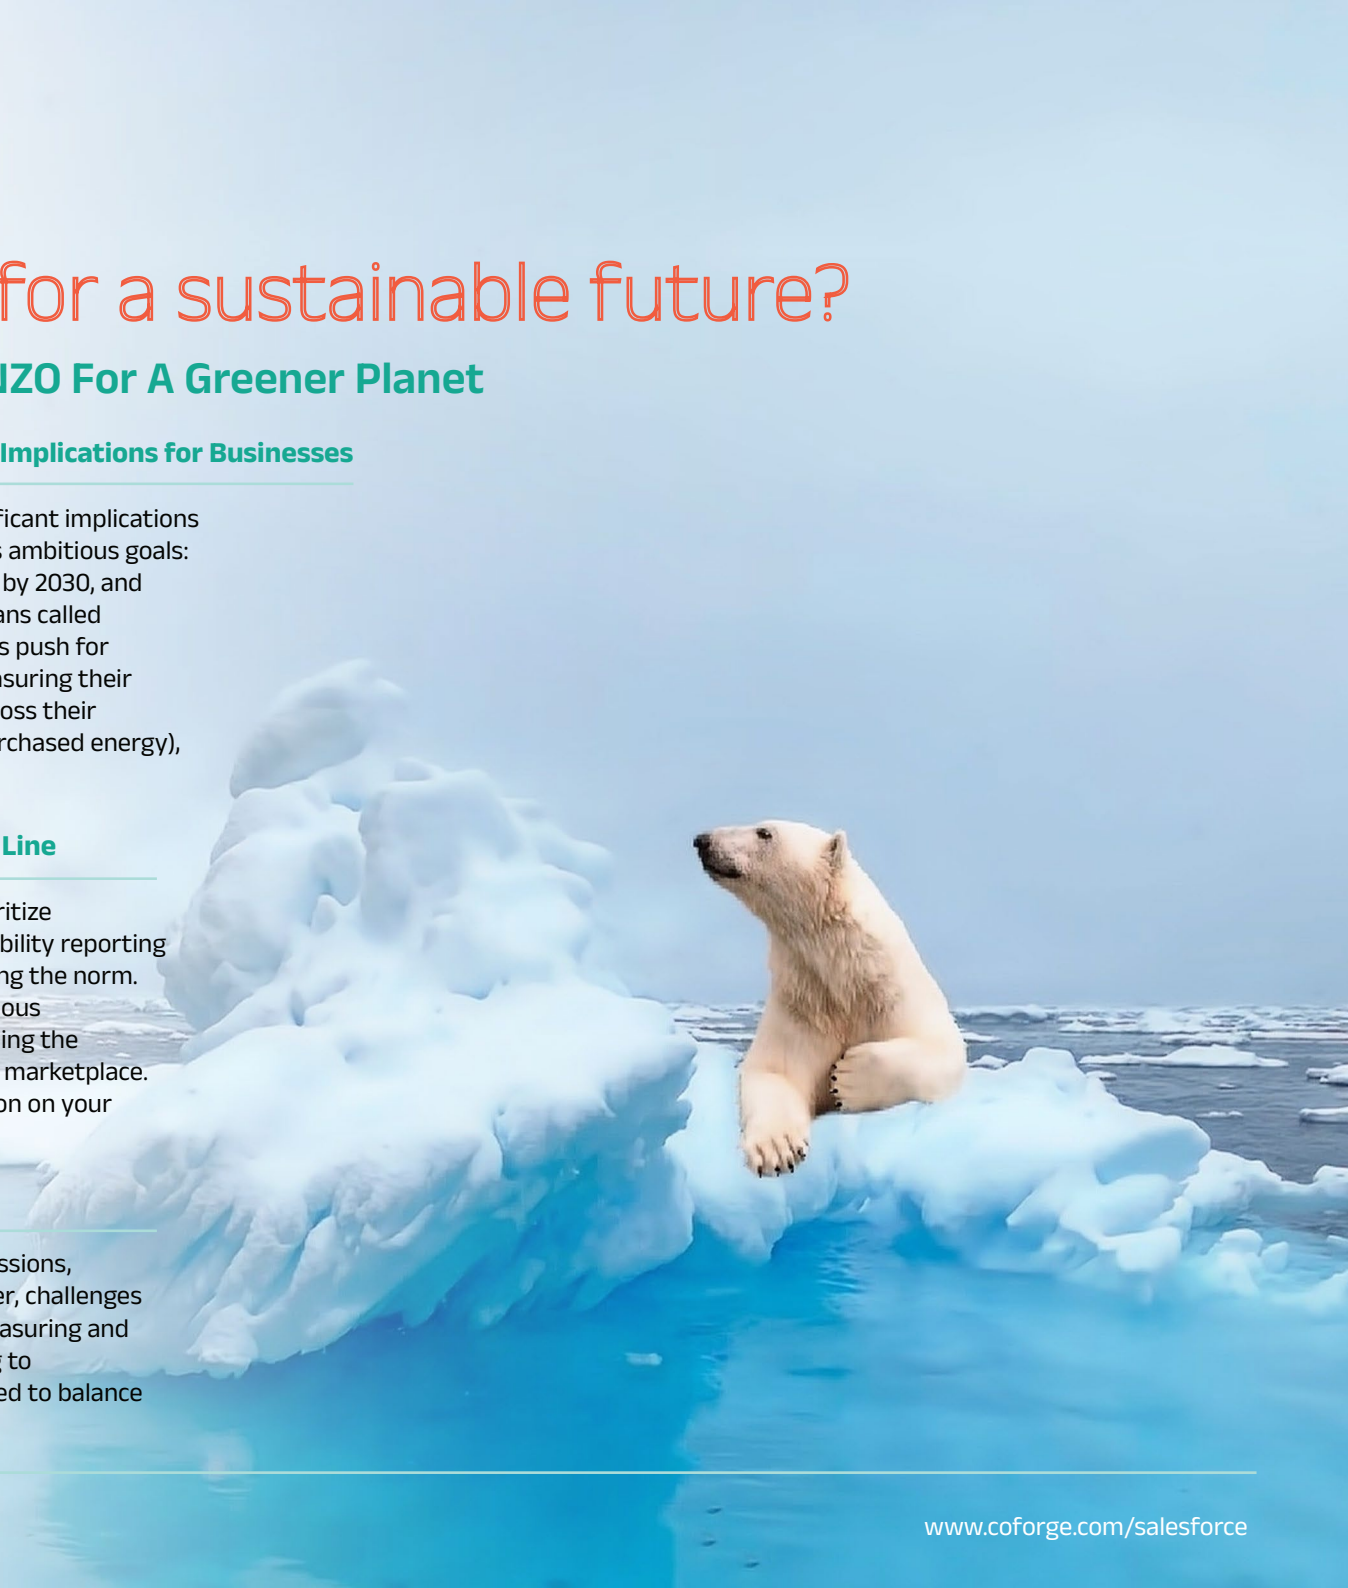

The Paris Agreement, a global pact to combat climate change, has significant implications for businesses worldwide. The agreement, signed by 195 countries, sets ambitious goals: limiting global warming to 1.5°C, achieving a 50% reduction in emissions by 2030, and reaching net-zero emissions by 2050. Countries outline their specific plans called Nationally Determined Contributions (NDCs) in 5-year review cycles. This push for sustainability has also led companies to adopt ESG frameworks for measuring their impact. Businesses are now required to track their carbon footprint across their operations and supply chain, including Scopes 1 (direct emissions), 2 (purchased energy), and 3 (indirect emissions from their supply chain).

Beyond Reputation: How Sustainability Impacts Your Bottom Line

The clock is ticking on sustainability. By 2025, 85% of investors will prioritize companies with robust ESG practices. Regulatory pressure for sustainability reporting and climate disclosures is intensifying globally, with hefty fines becoming the norm. Inaction could lead to millions in fines and lost revenue from eco-conscious customers. Competitors with strong ESG performance are already reaping the benefits: cost savings from clean energy, and a competitive edge in the marketplace. Now is the time to prioritize emissions reduction and take decisive action on your Sustainability strategy.

How to embark on a sustainability journey

Embarking on a sustainable journey involves tracking and reducing emissions, analyzing ESG insights, and driving sustainable transformation. However, challenges include high upfront costs for clean tech investments, difficulties in measuring and controlling supply chain emissions, lack of standardized metrics leading to inconsistency in reporting, data gaps, lack of ESG expertise, and the need to balance long-term sustainability goals with profits.

ENZO (Environmental & Net Zero Offering)

Coforge ENZO empowers organizations to address complex sustainability challenges through a comprehensive environmental management platform. Built on the #1 sustainability management software (as cited by Forrester) it enables accurate emissions tracking and management, culminating into Paris-compliant reports in alignment with global reporting frameworks

Services Suite

Data Transformation & Management: : Going from raw data capture to platform-ingestible data format via ESG-specialized data cleansing, transformation, and unification

Decarbonization Consulting & Advisory: Capital Project Delivery, Corporate Sustainability & Climate Change Strategy, Remediation Management, Sustainable Ops, Supply Chain Greening, and Carbon Markets Advisory

Carbon Accounting as-a-Service: End-to-end Carbon Accounting using transformed data and standardized global emission factors, ensuring a complete view of emissions data

Carbon Reporting as-a-Service: Holistic emissions reporting based on sector-specific reporting frameworks using real-time emissions data, culminating into audit-ready sustainability reports

ENZO Centre of Excellence: Custom reporting frameworks, platform configurations, and industry specific sustainability dashboards enabling continuous monitoring and pro-active corrective actions

How it works?

Streamlined Data Collection

We help you identify, gather, and transform the raw data from emissions sources across operations

Automated Carbon Accounting & Reporting

Automated emissions calculations, dashboards, and ESG reporting will be done by our Sustainability Management Platform

Strategic Actions

We enable you to build a robust decarbonization strategy with a perfect combination of platform-driven insights and our Consulting capabilities

Coforge strengthens its sustainability consulting portfolio through a strategic partnership with ERM, a leading pureplay sustainability consultancy. This collaboration elevates Coforge's offerings by adding a dedicated sustainability consulting pillar to its strategy and consulting framework.

ENZO is empowering businesses to track and manage carbon footprint which is a critical step towards achieving Net Zero goals. **NOW is the time to embrace climate-centric innovations!**

Be a leader and achieve success in a climate-conscious world.
